

Finally a roof system that retracts, allowing you to double the use of outdoor living spaces, restaurant forecourts, pubs or clubs. Retracted in fine weather to let in sunshine and warmth, IMPACT can be closed with the push of a button for protection against wind and rain.

IMPACT is a stacking retractable PVC roof, operated by motorised motion control and runner systems, integrated into existing or custom frameworks, designed to resist rain, keep out wind and completely or partially block hot sun.

Key Features:

- Can be integrated into existing or custom framework;
- Designed to resist the rain, high sun block and high wind resistance;
- The versatility of the product allows it to cover large areas in a practical, elegant manner;
- Designed with long lasting awning components to ensure the longest possible life with a minimum of maintenance;
- Designed to withstand strong winds up to 74 kph or force 8 on the Beaufort scale;
- Can be installed flat or tilted;
- Motorised operation or manual operation on two runner systems only.

Never worry about the season again
