

PT 60 is a classic retractable covering system. Timeless and versatile, it blends perfectly with a wide variety of settings. The system is custom made to protect against all elements, fixed to a supporting wall. It consists of a glulam timber structure and a folding canvas.

The structure, in Scandinavian timber autoclave treated in the sections cm: 4.5x15.5 - 6x22 - 12x18 - 12x12 is available with natural finish or with further finish in the following colours: chestnut (standard), walnut, anthracite, white, grey and ivory.

Key Features:

- Designed to resist the rain, high sun block and high wind resistance;
- The versatility of the product allows it to cover large areas in a practical, elegant manner;
- Designed with long lasting awning components to ensure the longest possible life with a minimum of maintenance;
- Designed to withstand strong winds up to 74 kph or force 8 on the Beaufort scale;
- Can be installed flat or tilted;
- Motorised operation or manual operation on two runner systems only;
- Painted with certified Qualicoat cycle epoxy powders.

Never worry about the season again
