

Client: Christies Beach High School
Location: Christies Beach, South Australia
Project: 20 Shaderunner Retractable Sail Systems
Fabric: Outlook 95% Polyester Mesh

Scope of Works:

The Christies Beach High School development features this Architecturally stunning student facility. The class rooms have large glazed facades utilising the available natural light. This presents it's own problem with excessive glare and solar heating gains compromising the energy efficient design of this eye-catching development.

Shadeform were engaged by the school to design, manufacture and install a series of 20 retractable Shaderunner systems to the existing pergola framework. The Shaderunner is a proven method of providing control over your shading requirements at home or in the commercial environment. High quality marine grade components combined with durable polyester mesh fabric ensure years of trouble free use for this effective retractable system. Why not call Shadeform for a quote?

..the confidence to deliver your commercial project..
