

**Client:** St Mary's College  
**Location:** St Mary's College, Franklin Street, Adelaide, South Australia  
**Project:** Technology Deck Sail  
**Fabric:** Ferrari 802 Waterproof PVDF Fabric

### Scope of Works:

The Client required an eye-catching and functional waterproof sail for the new Technology Deck as part of the School upgrade. As part of the design team, along with the project Architect and Engineer, Shadeform were engaged to design, manufacture and install this stunning waterproof sail on behalf of the College.

The Sail covers an area of 88 square metres and is supported by columns with innovative Engineer designed stainless steel back stays. Why not call Shadeform to discuss your next commercial project.
